

## Empower Investors and Financial Advisors with Advanced Options Strategy Analysis and Premium Options Trading Tools

In order to satisfy today's sophisticated investors, it is necessary to offer the types of transactions that they demand. With recent market volatility and the increased popularity of options trading, more investors are looking for access to premium trading tools to help capitalize on the opportunities available in the current environment.

Scivantage's Advanced Trading: Complex Options application is a robust system for delivering advanced option order entry to help investors and financial advisors trade more efficiently. With our system, advisors and investors can trade a variety of equity option strategies including spreads, straddles, covered calls, strangles and other multiple legged option strategies.

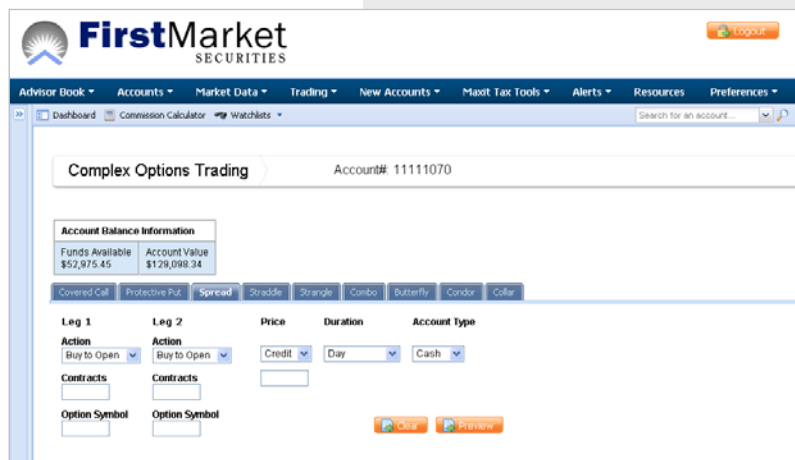

Modular in design, this premium trading application can be integrated with your existing trading platform or deployed as a premium component of either Scivantage Investor or Scivantage Professional.

### Key Features

- ▶ Search feature allows the user to filter on Symbol, Strike Price, Chain Type or Expiration
- ▶ Options chain includes Bid, Ask, Strike Price, Delta, Open Price and Interest, Volume, Last Price, Change versus Open Price and Intrinsic Value. This application prominently features the latest quote for the underlying symbol and an action link to access news, charts or the trade ticket for that underlying symbol
- ▶ Complex Options versions of Order Status and Positions for easy tracking and exiting of complex orders
- ▶ Easy chain-to-strategy conversion of multi-leg option trades – all distilled into a simple display that's easy to read, and even easier to adjust
- ▶ Configurable format gives users greater control over the page layout and default options, allowing them to modify their page to meet their needs

## Trade 9 Different Complex Option Strategies from a single interface!

- Covered Calls
- Protective Puts
- Spreads
- Straddles
- Strangles
- Combos (Long Call/Short Put)
